

Dear Dr. Lederberg : OCT. 12, 1960

I have just visited Dr. Cavalli in Pavia where I stayed for a week & had a most enjoyable time with people there including him. I am now on TEE train to Genève. I was told from him that when he visited Stanford last time, he met Dr. Kornberg who was writing a paper on his result of "nearest neighbor analysis" in DNA. Recently I have been very much interested in the problem of coding in DNA and I am wondering if I would be allowed to knowing his results and wonder if you would help me on it. Luca suggested me to write you as well as to Dr. Kornberg. I will be back to Mishima in two weeks. Best wishes to Mrs. Lederberg and yourself.

Thank you very much.

Sincerely
yours
Moto
